Hovering over a word will highlight it, and the name of the current page will also be highlighted. Clicking a word will send the user to the relevant page. (Selecting logo image will return the user to the home page). Body - The main content of the body will all be divided into large sections. Each section will have a h2 header followed by images and any relevant text. Examples of main sections could be featured content such as locations, activities, or holidays. These sections will be coloured the same, be spaced by approximately 10px and have rounded corners for a fluid modern design. Sub sections - A main section will be a flex parent that contains flex children displaying information for featured holidays. These sub sections will have a h3 header, an associated image such as a flag for the relevant location, and brief description of the holiday being offered. Under the parent header it may also be recommended to visit the "View Holidays" page for more information. On mobile these sections will flex vertically as normal block elements, but on website will flex in the same row to maximise 	h3 header, a rele associated image border. On mobile larger resolutions screen. 6 Footer - The foote site is for a fiction: Additional inform Grid Order Header Nav Main + Aside Footer S Font sizes h1 = bold 32px h2 = bold 24px h3 = bold 18px regular text + mobile Navigation menu des Colours Header and Footer- Mobile Nav Menu - # Desktop Nav and Bold Hovered/selected - # Sections and Aside - Sub-sections/form - incomplete sizes	vant paragraph of information, and particle if relevant, followed by a dashed or entire will be at the bottom of the page will be seperated onto the right side of the name "Leading choice of the name of	erhaps an dotted e, and on of the line that the Getaways". ponsively n. be rounded / main same design und und ckground ound
